"The unique playfulness and sculptural quality of the Aqua Pendant creates a focal point for any space. Sustainable mediums, which are handcrafted, lend an old-world feeling that brings a historical nod to even the most modern environment."

+ Inspired by sea and aquatic life, jGoodDesign's Aqua Pendant depicts the beauty and irregularity in nature. Three glass circles dropped in the fixture appear like bubbles surfacing from water. Handmade and eco-friendly, each pendant is made from partially recycled glass and hand-brushed aluminum, providing a stylish and modern feel.
