### Design style

I create sensuous interiors that blend a minimal aesthetic with global inspirations. Balance and harmony are the hallmarks of my vision. Lively contrasts — textures against clean lines, rich woods against sumptuous fabrics and shapes that are both challenging yet inviting — characterize

my work. My designs are flirtatious, elegant, tranquil, and classic.

### Vision

I took my cue from the rugged nature of Northern California. With an unexpected touch, I highlight the outdoors as a magical place to entertain by creating a diorama of an exposed wood-frame house, window, and forest. My installation contrasts the raw and elemental with the machine-made and opulent. The work of Kathy Colt and Emily Dvorin brings intriguing texture and handmade qualities to the enchanted scene.

### Design style

Bold colors, graphic patterns, and simple, geometric shapes have always influenced my work. As a designer, I use these elements to create spaces that are happy and exuberant. I have never met anything glittered, glam, or bright that I don't like. More is more.

### Vision

This room is intended to be fantastical and kaleidoscopic — a place where the familiar is simultaneously unexpected. Ealish Wilson's work transforms everyday materials into abstract compositions full of pattern, texture, and color. Juxtaposing this vibrant work with the simple yet bold geometric forms of Lilith Rockett's vessels creates an interesting tension that truly highlights each artist's work.
